

Informal Objection to application file BPFT-20160129AWL on behalf of WLKX-FM

To whom it may concern,

The recent application file BPFT-20160129AWL, application number 1720427, with respects to translator K284BZ has been found by technical advisors to Lakes Broadcasting Co Inc., licensee of WLKX-FM, to interfere with WLKX-FM and overlap the 60dBu protected contours outlined in the Commissions rules 74.1204(a).

The proposed K284BZ directional pattern outlined in the above mentioned application would cause interference to an estimated 2,789 listeners and an area of 2.87km within the WLKX-FM protected 60dBu contour. See the attached pattern study regarding the prohibited interference in question.

Lakes Broadcasting Co. Inc. respectfully requests that the Commission deny this application based on these findings of interference to WLKX-FM in accordance with the Commissions rules outlined in 74.1204(a).
